1. Executive Summary

Kastovia Holdings LLC is a registered limited liability digital technology company operating from Tbilisi, Georgia. The company has two complementary activities: B2B digital technology services and proprietary digital product development.

2. Business Model

The company provides AI-driven workflow automation, Generative Engine Optimization, IT integration consulting, and digital product planning. It also develops in-house mobile applications as owned digital assets.

3. Services And Deliverables

- AI-driven workflow automation for repetitive operational processes.
- Generative Engine Optimization for AI search and answer-engine visibility.
- IT integration consulting for connecting tools, data, CRM systems, websites, dashboards, and internal platforms.
- Mobile application research, UX planning, analytics, launch support, and monetization planning.

4. Revenue Model

- Project-based consulting and implementation fees.
- Fixed-scope automation, GEO, and integration engagements.
- Monthly retainers for advisory, maintenance, optimization, and support.
- Mobile application revenue through subscriptions, in-app purchases, advertising, licensing, or partnerships.

5. Expected Bank Account Activity

The business account is expected to receive client payments and product revenue, and to pay vendors, contractors, software providers, hosting providers, marketing providers, tax, accounting, administrative, and product development expenses.

6. Compliance And Risk Positioning

Kastovia Holdings LLC is a digital technology company. It does not present itself as a bank, payment institution, investment firm, broker, crypto exchange, gambling operator, adult entertainment business, weapons business, or regulated financial intermediary.
